

Student Assignment Management Platform

Pitch Deck

Hello,

Efrat Segal, Founder & CEO of Boostability

- Personal:
 - Mom of two Neurodivergent teenagers.
 - Late-diagnosed with ADHD in her 40s.
- Career & Education:

Product Leadership: Led product at JFrog, Redis, Bizzabo.

- MBA, Babson College, Wellesley, MA
- BA in Computer Science, Reichman University, Herzliya, Israel

***I navigate ADHD daily. I'm raising two kids with ADHD.
I built Boostability because I refused to accept that
nothing better existed.***

The Student Reality

Millions of college students can't keep up with their academic assignments, and the same challenges persist in their professional lives. **Our students are: underserved, first-generation, minority, neurodivergent, and non-traditional students.** The ones most likely to drop out, least likely to get support

90%

Students procrastinate on their assignments

The habit costs them grades, confidence, and career potential.

1 in 4

Students drop out because of academics

No degree = limited career options and lifelong income gaps.

1 in 5

Students drop out due to mental health struggles

Stress, anxiety, and overwhelm push students out before they ever reach their potential.

20%

Have Executive Function Deficits

Stress and anxiety rob them of college and their potential.

What Institutions Need

Systems that catch struggling students early, help them succeed, and recover the billions in prevented dropout losses.

6+ Hours Weekly

Faculty spend 6+ hours weekly grading without seeing which students are struggling, yet this time could drive early intervention.

Too Late to Intervene

Struggling students only become visible after midterm, when intervention windows have largely closed and recovery is difficult.

\$33B Lost Annually

\$33 billion lost annually to college dropout, recoverable through early intervention.

\$18K–\$30K Per Dropout

Each student who leaves costs institutions \$18,000 to \$30,000 in revenue from tuition, housing, and resources—funds that retention could recover.

Students Are Falling Through the Cracks

College students enter higher education lacking executive function skills. Assignments accumulate, deadlines slip, anxiety builds. Faculty notice the struggle too late. Early visibility and support could prevent dropout and transform outcomes.

The Student Gap

Students enter college without the executive function structure and scaffolding needed to manage coursework from the start.

The Faculty Gap

Faculty lack visibility into struggling students until midterm, leaving little time for meaningful intervention and support.

The Institutional Cost

Every dropout earns 40% less over their lifetime. Institutions lose billions annually. The ripple extends through families, communities, and the economy.

🌟 Introducing Boostability Student Assignment Management Platform Powered by AI

Boostability is a platform purpose-built to bridge the gap between student intent and academic execution, while giving faculty the early visibility to intervene and prevent student dropout.

Boostability Student Approach

Boostability's mobile app transforms intimidating assignments into daily executable tasks. Instead of staring at a blank page, students receive a personalized step-by-step action plan with SMS nudges that keep momentum alive from start to submission.

1

Overwhelm Assignment

Boostability breaks overwhelming assignments into doable, step-by-step daily tasks, customized and flexible to each student's unique needs and pace.

2

Smart Notifications That Stick

Smart SMS notifications tailored to each student's needs and schedule, providing encouragement and momentum without creating pressure.

3

Meeting Deadlines

Students move from overwhelm and procrastination to confident, on-time completion.

Boostability Mobile Experience

Real-time focus. Structured breakdown. SMS accountability. Built for students who need the most support.

Students move from procrastination to execution.

Student's assignment is already in Boostability, just review it and break it down.

Add Your Assignment

Add your assignments (we call them activities) and Boostability will turn it into achievable daily tasks

Activity name ***(Required)***

Balance sheet for Walmart

Class ***(Required)***

FIN101

Activity start date ***(Required)***

3/29/2026

Activity due date ***(Required)***

3/29/2026

Activity details ***(Required)***

Tell me about your assignment by typing, pasting, or uploading a PDF below. Include when you can study (days/times) and how long you can focus. More details = better customized tasks!

In this assignment, you will analyze Walmart's balance sheet to gain hands-

SMS nudges reach students where they actually check their phone.

Boostability 360 Approach

We built Boostability 360 to close the loop. Students need structure, faculty need visibility, and institutions need outcomes. One platform does all three.

Assignment Engagement

Faculty see the complete picture of assignment work as it unfolds. Track progress, identify stalls, and support students before momentum dies

Your System, Your Way

Plugs into Canvas, Blackboard, and other platforms faculty already use. Flexible integration means zero new training or workflow changes.

Early Risk Detection

Boostability detects early warning signs before midterm, empowering faculty to intervene and prevent student dropout.

Your Institution, Your Choice

Whether you're faculty managing assignments, success teams supporting struggling students, or leadership tracking retention, Boostability 360 adapts to your specific needs and role.

Boostability 360 Experience

Faculty identify at-risk students in seconds. Early intervention prevents failure and dropout.

This is where equitable support begins. Faculty see which students need help most and act before it's too late.

Boostability Holistic Outcome

Students

Move from overwhelm to execution.
Students meet deadlines, build confidence through wins, reduce stress, and develop sustainable habits for success in school and beyond.

Faculty

- Improving assignment clarity cuts student questions and office hours, freeing time for quality teaching.
- Spotting struggling students early enables intervention before problems spiral.

Institutions

Boostability builds cost-effective engagement across campus. Students engage more deeply in assignments and execute, faculty engage in meaningful teaching rather than reactive support, and institutions see higher retention and stronger reputation.

Traction & Validation

North Star KPI: 90% of students submit assignments on time

Current State:

- 50+ active paid students
- 100+ pilot completed
- 100% midterm pass rate
- 0 dropouts

100+ Student Pilot Completed, 50 Active in Paid Pilot

Active pilots with measurable outcomes demonstrating product-market fit.

Pace University Startup in Residence

Accepted into Pace University's competitive startup residency program.

Columbia eLab Fellowship

Selected for Columbia University's competitive education entrepreneurship lab.

Microsoft & AWS Founders

Members of Microsoft Founder Hub and AWS Founders Club.

Revenue Milestones: A Clear Path to Scale

Boostability's growth trajectory is grounded in active pilots and a repeatable go-to-market playbook. Each milestone builds on the last from validation to category leadership.

Business Model

Core Pilot Pricing

\$12 per student per month, faculty members are included.

- For a 9-month academic year.
- Includes Boostability mobile app and Boostability 360.

\$1,200/mo

Monthly revenue per
100-student school

6.4 months

CAC payback period per
school

Year 2+ Pricing Tiers

Student Range	Annual Price	Per Student
Up to 1,000	\$25,000	~\$25
1,001 – 2,000	\$40,000	~\$20–\$40
2,001 – 5,000	\$60,000	~\$12–\$30
5,001 – 10,000	\$80,000	~\$8–\$16
10,000+	\$80,000+	Custom enterprise

Market Opportunity

US Higher Ed Market (TAM):

18.3 million students enrolled in 4,000 institutions in the US.

Non-Traditional Higher Ed, age 25+ Market (SAM):

6.3 million students aged 25+ across 3,500 institutions in the US.
[resource](#)

Why Now

- First-year students 25+ surged 19.7% in fall 2024.
- 13% decline in high school graduates.

[resource](#)

The Numbers Are Compelling

1/3 of students by 2030 will be age 25+

[resource](#)

Decline in HS Graduate till 2041

[resource](#)

GTM Phase 1: Dual Pilot Validation

Boostability pilots with traditional and non-traditional institutions to prove outcomes before scaling. Early validation shows which models work where.

Traditional Track

Pilot with 100+ students in a structured academic program.
Proves Boostability reduces missed deadlines, increases student confidence, and cuts procrastination.

Non-Traditional Track

Paid pilot of 100+ adult learners with a career school network (14,000-student customer base). Validates Boostability's impact on dropout reduction and institutional adoption model.

GTM Phase 2: Scale

With validated outcomes from pilot students, Phase 2 deploys a multi-channel outreach strategy targeting senior decision-makers across student success, academic affairs, and enrollment management.

1

Direct Institutional Outreach

Targeted outreach to provosts, deans, and VP-level student success officers at non-traditional and community college networks.

2

Pilot School Referral Flywheel

Satisfied pilot partners become advocates. Peer referrals from trusted institutional colleagues are the highest-converting GTM channel in higher ed.

3

Conference Presence

Active presence at **UPCEA, NASPA, and AACC** conferences where target buyers gather annually.

The Team

Boostability started with a real problem. It was built from personal experience, academic research, and deep institutional relationships. The team combines lived expertise with proven connections in higher education.

Efrat Segal - Founder & CEO

Built Boostability from personal pain with the academic system. Has led all pilots, partnerships, and product development. Deeply embedded in the student success community.

Tamir Harosh - Strategic Advisor

Brings deep higher education expertise and a proven network for institutional GTM. Guides partnership strategy and institutional sales at the executive level.

Why the Market Is Ready Right Now

Three forces align: online learning, adult learner demand, and enrollment pressure. This creates an urgent window for solutions.

88% of Colleges Expanding Online

Per the CHLOE 2025 report, online and hybrid learning is now a permanent institutional strategy — dramatically expanding the need for digital student support infrastructure.

[resource](#)

Adult Learner Market Growth

2024: \$398.25 billion

2032: \$644.44 billion (projected)

Growth Rate: 7.12% CAGR through 2032

[resource](#)

Pilots Live, PMF Validated

Boostability isn't a hypothesis — it's a proven platform with active pilots, measurable outcomes, and institutional champions ready to expand.

💡 Key Performance Metrics: Real Student Outcomes

In a 6-week pilot, Boostability delivered extraordinary results. These aren't projections. They're real outcomes from real students in real classrooms.

0

Dropouts

vs. a **44% historical dropout rate** at the same institution prior to Boostability

100%

Midterm Pass Rate

Every student who used Boostability passed their midterm assessment

98%

Persistence Rate

Students who started with Boostability stayed enrolled through the end of the term

2→4

Org Skills (out of 5)

Student-reported organizational skills nearly doubled over 6 weeks of active use

Student Stories: In Their Own Words

Real people. Real struggles. Real transformation. These stories show what Boostability actually does - it's not just about keeping students enrolled, it's about changing how they see themselves.

S., Indiana University

"I was surviving, not living. Now I sleep without pills and feel confident about school for the first time. Boostability didn't just help me with assignments — it changed how I see myself as a student."

A., Florida University

"I finally feel like I can succeed in school and live my life. Before, every assignment felt impossible. Now I actually know what to do next — and I do it."

 Stress levels dropped from 7/10 to 4/10 across pilot participants. Organizational skills rose from 2/5 to 4/5 in just 6 weeks.

Funding Ask: Raising \$750K to Scale

5.07%

\$750K seed round to accelerate sales, improve the product, and own the non-traditional student success market. The window to move fast is now.

Use of Funds: What Your Investment Buys

1

GTM & Team - \$300K (40%)

Hire the first institutional sales rep and student success partner.
Fund direct outreach to provosts and deans at target schools.
Build the revenue engine.

2

Product - \$225K (30%)

Deepen AI personalization, expand LMS integrations, and build out the Boostability 360 analytics dashboard to enterprise-grade spec.

3

Lead Development & Conferences - \$112K (15%)

Direct outreach to target institutional buyers (provosts, VPs of student success). Conference presence at UPCEA, NASPA, AACCC where decision-makers gather. Build the sales pipeline.

4

Insights & Operations - \$113K (15%)

Fund ongoing outcome research to strengthen the evidence base, plus operational infrastructure to support scale without sacrificing quality.

What \$750K Unlocks

With this round closed, Boostability's 2027 milestones are well within reach — and each one builds the foundation for the \$3M+ ARR trajectory in 2028.

5+

Contracts Signed

Five + partners institutional contracts for new customers or expansion representing diverse school types and geographies.

1,500

Active Students

Students using Boostability daily across partner institutions.

\$600K

ARR

Annual recurring revenue target for end of 2027 paving the way for Series A.

Current legal structure: LLC. Planning B Corp certification at funding close, reflecting our commitment to social impact alongside financial returns.

Let's Talk

Believe every student can succeed with the right structure? Believe institutions should see their students clearly? We're building this together. Boostability is raising now.
